

## How to add maps to LXSIM

1. Run SeeYou and then File->Mobile Wizard
2. Tick only Terrain (select high details) and Roads, Rails, Lakes and Towns. Leave everything else unticked.
3. Press Next and enter under Files basename "earth".
4. Under destination select Copy to My Computer and press Browse button.
5. Search for folder where you LXSIM is installed. Usually it will be c:\Program Files\LXNAV\LXSim.
6. Select data subfolder c:\Program Files\LXNAV\LXSim\data\ (In this folder there should already be a file earth.cit)
7. Press Next again
8. Select region you would like to see
9. Press Next again.
10. Run Mobile Wizard again
11. Tick only Terrain elevations. Leave everything else unticked.
12. Press Next and enter under Files basename "elev".
13. Repeat steps 4 to 9.
